

CULTURE (Cont'd)

Milorganite. April 1st, 4-8-10 with Nutritional Spray. April 15th 4-8-10 with Milorganite.

Continue the fertilizing schedule during the Summer months with 4-8-10, and use Nutritional Spray and Milorganite only when the foliage shows a need of being stimulated.

The TWO week fertilizing schedule should be maintained until it is time to apply 2-12-12 for firming up the stems for cooler weather. Use Dolomitic Limestone when necessary for reducing soil acidity.

For plants in gallon or five quart cans, use same schedule, but one teaspoonful per feeding.

With my sincere wish for each of you, more and better Hibiscus.

Hibiscusly yours,

* OTHER PLANTS *

I like the silent pictures the best,
Their return I would greet with a shout.
To see a woman open her mouth,
And not a sound come out.
